About This Game

Mindless Running - it's a classic runner with story mode. Explore a randomly-generated world while listening to a unique soundtrack.

Our hero will have to go off on a dangerous journey, go through thick and thin, overcome hardships and obstacles to get to his Granny (who has baked his favourite Pedigree snacks for her beloved grandson). Due to player needs motivation, during the journey the lives of the hero and his friends will be permanently in danger. See if you can take that!

Despite a chosen difficulty level it will always be hard as HELL! Test yourself and complete a number of challenging levels to enjoy to the full one of the main features of the game - its system of narrative dialogues in the spirit of modern role-playing AAA projects with a shade of delicate irony.

Earn as many points as possible while playing normal game mode to unlock Steam achievements! There are no ratings and best scores in Mindless Running - you're too unique and it's no need for anyone to know your results. Anyway you are the smartest and the hottest here.

Fun old school coaches. The models of the interior and the people within are hilariously bad in noclip mode, but everything else seems to be detailed enough. Comes with 1st class, 3rd class, brake/luggage, and even comes with slip coaches. If you're a fan of these coaches, I'd say give them a try. They're certainly better than any 3rd party add-on.

Pro tip, RH and LH just means which way they start out facing. If you want composite to have first class first in Quick Drive, just use RH. If you want the brake+3rd class coach to have luggage at the end, just use LH.. Clickdraw is an addictive completely RNG western clicker game*he says.The only acceptable part about this are the cards.Why is this garbage still on steam?!?!?! I started playing this on a whim, nearly put it down again, but decided to stick it through. I'm glad I did! While the opening sets up some kind-of tired horror tropes, the more you explore, the more you get the opportunity to experience some genuinely fun and interesting mechanics. I don't want to spoil anything, but there's a lot more to this game than just exploring a spooky house while being chased like a ghost. In true lovecraftian tradition, there's a depth to this game beyond what you see on the surface. Definitely worth checking out if you're into horror!. Tachyon the fringe is a space sim with a role playing part that involves doing jobs for cash to upgrade and buy ships etc.

I found it easily one of the best Space sim I have played although Freespace1 and 2 a close 2nd. The jobs are difficult and you need to rely on your wing man to chase bad guys while you escort a no. of ships from A to B and then c.

There is a great ring flying part where you have to fly throo ever increasing complecity of ring layout and is a great aide to sharpening up on your joystick skills.. Creative games with lots to see and do, I especially love the puzzles and mini games. Also love the game progression and combat with cute (but deadly!) enemies and character customisation. This game is visually stunning and the music is beautiful. Can't wait to see more!. Picked game up on Indie Gala. It's a bit of fun, I got my 30 cents worth. It has cards. Controls were confusing using a controller, instructing me to press button 9? Buy it for the cards, 5mins of fun and don't pay full price for it.. This is a very well designed exploratory adventure for all ages, with a nostalgic feel, but enough challenge to keep adults entertained for hours. It skirts the line between a point-and-click adventure and a platformer, and has plenty of collectibles and challenging achievements..

Surprisingly a quite pleasant spin-off that can give you a little bit of casual entertainment, although it's not a game that really stands out. This is quite literally just some 2D golf with a few small extra twists. It was moderately fun for a while.. It would appear this is multiplayer only. I tried the "Normandy" mission which was actually the Battle of Shanghai. Well, the map was totally devoid of landscape, and I was the only player in the game. It was sup[posed to be single player, but apparently the game defaulted to some capture the flag multiplayer nonsense. looked good, but I can not recommend,

Here is my point of view...

Look... The game is nice with all of the puzzles and stuff,
but to be honest i dont think anyone got it because of the gameplay.
the only reason i got it was for the achievements...
And im sure that the creator of this game knows that (Aevoa).
i also think that 7 games of basicly the same thing is a bit over board.
i think hes starting only to make those games to make money.

Final thoughts:

is it worth 0.99\$?

That depends... if you dont care about how you account page looks then dont,
If you do care tho... Then go for it i wont hold you back!

BUT DONT BUY IT JUST FOR THE PUZZLES!. A really fun, intense game for \$.99. Would recommend.. Very good casual game in anime-style. In game you can see interest characters, so you'll not be boring. Recommend this game!. Definitely worth its price. The only disadvantage is lacking shortcut key.. As some gaming laptops are tested for their 3DMark 11 performance, its nice that this software allows me to compare their performance against my gaming desktop.. dumb game. not worth 7 dollars. 2/5 stars. would buy again.
